

# Flowing World Substitution Scheme

Green spots indicate corners of inflated tile

Edge colouring of tiles (not shown above) makes tiles translation-only tiles

E.g.

All tiles have same edge colouring scheme

Arrow colours are unnecessary given edge colourings.

The Flowing World was originally styled as a 3 tile + 3 mirror-image tile (colours having clockwise) tiling but was later found to need a second diagonal stripe to prevent periodicity. This tiling was a precursor to the 2-square tiling which is equivalent to Goodman-Strauss' tricolour and cross tiling.
